

ASSIGNMENT 3 SUBMISSION.

QUES 1. Create a multi-section resume page using only HTML.

Include:

- <header> → Name & contact info
- <nav> → Quick links (About, Skills, Projects, Education)
- <main> →
 - <section> About Me
 - <section> Skills (unordered list)
 - <section> Projects (ordered list)
 - <section> Education (table format with course, institute, year)
- <footer> → Copyright info.

soln:

```
<!DOCTYPE html>
```

```
<html lang="en">
```

```
<head>
```

```
  <meta charset="UTF-8">
```

```
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
  <title>Shivam Shankhdhar - Resume</title>
```

```
</head>
```

```
<body>
```

```
  <!-- Header section -->
```

```
  <header>
```

```
    <h1>Shivam Shankhdhar</h1>
```

```
    <p>Email: shivam@example.com | Phone: +91-XXXXXXXXXX | Location: Budaun, Uttar Pradesh</p>
```

```
  </header>
```

```
  <!-- Navigation section -->
```

```
<nav>

  <a href="#about">About</a> |
  <a href="#skills">Skills</a> |
  <a href="#projects">Projects</a> |
  <a href="#education">Education</a>

</nav>
```

```
<!-- Main content -->
```

```
<main>
```

```
  <!-- About Me section -->
```

```
  <section id="about">
```

```
    <h2>About Me</h2>
```

```
    <p>I am a Computer Science student specializing in Data Science and Artificial Intelligence. I am interested in programming, data analysis, machine learning, and web development.</p>
```

```
  </section>
```

```
  <!-- Skills section -->
```

```
  <section id="skills">
```

```
    <h2>Skills</h2>
```

```
    <ul>
```

```
      <li>Python</li>
```

```
      <li>SQL</li>
```

```
      <li>HTML</li>
```

```
      <li>Java</li>
```

```
      <li>MS Excel</li>
```

```
      <li>Data Visualization</li>
```

```
    </ul>
```

```
  </section>
```

<!-- Projects section -->

<section id="projects">

<h2>Projects</h2>

PhishGuard - Phishing Detection System

Brain Stroke Detection using Machine Learning

DAYTRACK - Schedule Tracking Application

</section>

<!-- Education section -->

<section id="education">

<h2>Education</h2>

<table border="1">

<thead>

<tr>

<th>Course</th>

<th>Institute</th>

<th>Year</th>

</tr>

</thead>

<tbody>

<tr>

<td>B.Tech Computer Science (Data Science & AI)</td>

<td>GLA University, Mathura</td>

<td>2024 - 2028</td>

</tr>

<tr>

<td>Senior Secondary (12th)</td>

```

        <td>School</td>
        <td>2024</td>
    </tr>
</tbody>
</table>
</section>
</main>

<!-- Footer section -->
<footer>
    <p>&copy; 2025 Shivam Shankhdhar. All Rights Reserved.</p>
</footer>
</body>
</html>

```

QUES 2. Build a Product Catalog page for an online store using only HTML:

- Use a <table> to list products with columns → Product Name, Description, Price, and Availability.
- Add one image per product using inside a cell.
- Use attributes like colspan and rowspan where necessary.

soln:

```

<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Product Catalog</title>
</head>
<body>

```

```
<!-- Product Catalog heading -->
```

```
<h1>Online Store - Product Catalog</h1>
```

```
<!-- Product table -->
```

```
<table border="1">
```

```
  <thead>
```

```
    <tr>
```

```
      <th>Product Name</th>
```

```
      <th>Description</th>
```

```
      <th>Price</th>
```

```
      <th>Availability</th>
```

```
      <th>Image</th>
```

```
    </tr>
```

```
  </thead>
```

```
  <tbody>
```

```
    <tr>
```

```
      <td>Laptop</td>
```

```
      <td>High-performance laptop for work and study.</td>
```

```
      <td>₹60,000</td>
```

```
      <td rowspan="2">In Stock</td>
```

```
      <td></td>
```

```
    </tr>
```

```
    <tr>
```

```
      <td>Smartphone</td>
```

```
      <td>Modern smartphone with advanced features.</td>
```

```
      <td>₹30,000</td>
```

```
      <td></td>
```

```
    </tr>
```

```

<tr>

    <td>Headphones</td>

    <td>Wireless headphones with clear sound quality.</td>

    <td>₹2,000</td>

    <td>Out of Stock</td>

    <td></td>

</tr>

```

```

<!-- Colspan example -->

<tr>

    <td colspan="5">End of Product Catalog</td>

</tr>

</tbody>

</table>

```

```

</body>

</html>

```

QUES 3. Create a Course Registration Form structure using HTML only.

It should include:

- <fieldset> and <legend> for grouping fields.
- A <select> dropdown for selecting a course.
- <input> fields for name and email.
- A <table> at the bottom showing available course schedules (Day, Time, Instructor).

soln :

```

<!DOCTYPE html>

<html lang="en">

<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <title>Course Registration Form</title>

```

</head>

<body>

<!-- Course Registration Form -->

<h1>Course Registration Form</h1>

<form>

<!-- Personal information fields -->

<fieldset>

<legend>Student Information</legend>

<label for="name">Name:</label>

<input type="text" id="name" name="name">

<label for="email">Email:</label>

<input type="email" id="email" name="email">

<!-- Course selection dropdown -->

<label for="course">Select Course:</label>

<select id="course" name="course">

<option value="python">Python</option>

<option value="java">Java</option>

<option value="web">Web Development</option>

<option value="datascience">Data Science</option>

</select>

</fieldset>

</form>

<!-- Available course schedules -->

<h2>Available Course Schedules</h2>

```
<table border="1">

  <thead>

    <tr>

      <th>Day</th>

      <th>Time</th>

      <th>Instructor</th>

    </tr>

  </thead>

  <tbody>

    <tr>

      <td>Monday</td>

      <td>10:00 AM - 11:00 AM</td>

      <td>Mr. Sharma</td>

    </tr>

    <tr>

      <td>Wednesday</td>

      <td>12:00 PM - 1:00 PM</td>

      <td>Ms. Priya</td>

    </tr>

    <tr>

      <td>Friday</td>

      <td>2:00 PM - 3:00 PM</td>

      <td>Mr. Verma</td>

    </tr>

  </tbody>

</table>

</body>

</html>
```

QUES 4. Create a Company Layout Page using only block-level elements:

- <header> → Company name

- <nav> → Navigation links
- <main> → Two <section>s:
 - About the company
 - Services offered (list)
- <aside> → Display a blockquote from the company's CEO.
- <footer> → Contact email and address.

Soln:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Company Layout</title>
</head>
<body>
  <!-- Header section -->
  <header>
    <h1>TechNova Solutions</h1>
  </header>

  <!-- Navigation section -->
  <nav>
    <a href="#">Home</a> |
    <a href="#">About</a> |
    <a href="#">Services</a> |
    <a href="#">Contact</a>
  </nav>

  <!-- Main content -->
  <main>
```

<!-- About company section -->

<section>

<h2>About the Company</h2>

<p>TechNova Solutions is a technology company that provides innovative digital solutions and software services to businesses.</p>

</section>

<!-- Services section -->

<section>

<h2>Services Offered</h2>

Web Development

App Development

Data Analytics

Cloud Services

</section>

</main>

<!-- CEO quote -->

<aside>

<h2>CEO's Message</h2>

<blockquote>

"Innovation and technology are the keys to building a better future."

</blockquote>

<p>— CEO, TechNova Solutions</p>

</aside>

<!-- Footer section -->

<footer>

<p>Email: info@technova.com | Address: Mathura, Uttar Pradesh, India</p>

```
</footer>
</body>
</html>
```

QUES 5. Create a Nested List Structure representing a “University → Departments → Courses → Topics” hierarchy. Use nested and lists properly to show multi-level structure.

Soln:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>University Hierarchy</title>
</head>
<body>
  <!-- University hierarchy using nested lists -->
  <h1>University</h1>
  <ul>
    <li>Computer Science
      <ol>
        <li>Data Science
          <ul>
            <li>Python</li>
            <li>Machine Learning</li>
            <li>Data Visualization</li>
          </ul>
        </li>
        <li>Web Development
          <ul>
            <li>HTML</li>
            <li>CSS</li>
```

```

        <li>JavaScript</li>
    </ul>
</li>
</ol>
</li>

<li>Electronics
    <ol>
        <li>Embedded Systems
            <ul>
                <li>Microprocessors</li>
                <li>Microcontrollers</li>
            </ul>
        </li>
        <li>Communication
            <ul>
                <li>Digital Communication</li>
                <li>Wireless Communication</li>
            </ul>
        </li>
    </ol>
</li>
</ul>
</body>
</html>

```

QUES 6. Build a Restaurant Menu Page using:

- <header> for restaurant name.
- <nav> for categories (Starters, Main Course, Desserts).
- <section> for each category containing a table of items with columns: Dish Name,Description, and Price.
- <footer> for contact details.

Soln:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Restaurant Menu</title>

</head>

<body>

  <!-- Restaurant header -->

  <header>

    <h1>Spice Garden Restaurant</h1>

  </header>

  <!-- Menu categories -->

  <nav>

    <a href="#starters">Starters</a> |

    <a href="#maincourse">Main Course</a> |

    <a href="#desserts">Desserts</a>

  </nav>

  <!-- Starters section -->

  <section id="starters">

    <h2>Starters</h2>

    <table border="1">

      <tr>

        <th>Dish Name</th>

        <th>Description</th>

        <th>Price</th>

      </tr>

      <tr>
```

```

        <td>Paneer Tikka</td>

        <td>Grilled paneer with spices and vegetables.</td>

        <td>₹180</td>
    </tr>

    <tr>

        <td>Veg Spring Roll</td>

        <td>Crispy rolls filled with fresh vegetables.</td>

        <td>₹150</td>
    </tr>
</table>
</section>
```

```

<!-- Main Course section -->
<section id="maincourse">
    <h2>Main Course</h2>
    <table border="1">
        <tr>
            <th>Dish Name</th>
            <th>Description</th>
            <th>Price</th>
        </tr>
        <tr>
            <td>Paneer Butter Masala</td>
            <td>Paneer cooked in a rich creamy tomato gravy.</td>
            <td>₹250</td>
        </tr>
        <tr>
            <td>Veg Biryani</td>
            <td>Fragrant rice cooked with vegetables and spices.</td>
            <td>₹220</td>
        </tr>
```

</table>

</section>

<!-- Desserts section -->

<section id="desserts">

<h2>Desserts</h2>

<table border="1">

<tr>

<th>Dish Name</th>

<th>Description</th>

<th>Price</th>

</tr>

<tr>

<td>Gulab Jamun</td>

<td>Soft milk-based sweets served with sugar syrup.</td>

<td>₹100</td>

</tr>

<tr>

<td>Ice Cream</td>

<td>Chilled creamy dessert available in different flavors.</td>

<td>₹120</td>

</tr>

</table>

</section>

<!-- Footer with contact details -->

<footer>

<p>Email: info@spicegarden.com | Phone: +91-9876543210 | Mathura, Uttar Pradesh</p>

</footer>

</body>

</html>

QUES 7. Design a Conference Schedule page using HTML tables and semantic tags.

The table should have:

- Sessions (Morning, Afternoon, Evening)
- Columns for Time, Topic, Speaker
- Use <thead>, <tbody>, and <tfoot> for structure.

Sol:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Conference Schedule</title>

</head>

<body>

  <!-- Conference schedule -->

  <header>

    <h1>Technology Conference 2026</h1>

  </header>

  <main>

    <table border="1">

      <!-- Table header -->

      <thead>

        <tr>

          <th>Session</th>

          <th>Time</th>

          <th>Topic</th>

          <th>Speaker</th>

        </tr>

      </thead>
```

<!-- Table body -->

<tbody>

<tr>

<td>Morning</td>

<td>9:00 AM - 10:00 AM</td>

<td>Introduction to AI</td>

<td>Dr. Sharma</td>

</tr>

<tr>

<td>Morning</td>

<td>10:30 AM - 11:30 AM</td>

<td>Data Science Trends</td>

<td>Ms. Priya</td>

</tr>

<tr>

<td>Afternoon</td>

<td>1:00 PM - 2:00 PM</td>

<td>Machine Learning</td>

<td>Dr. Verma</td>

</tr>

<tr>

<td>Afternoon</td>

<td>2:30 PM - 3:30 PM</td>

<td>Cloud Computing</td>

<td>Mr. Raj</td>

</tr>

<tr>

<td>Evening</td>

<td>5:00 PM - 6:00 PM</td>

<td>Future of Technology</td>

```

        <td>Dr. Mehta</td>

    </tr>

</tbody>

<!-- Table footer -->

<tfoot>

    <tr>

        <td colspan="4">End of Conference Schedule</td>

    </tr>

</tfoot>

</table>

</main>

</body>

</html>

```

QUES 8. Create a Student Report Page:

- <h1> for school name.
- <table> for marks of 5 subjects.
- Add a row that shows Total and Percentage (no calculation needed, just text).
- Use attributes like rowspan, colspan, and title to improve clarity.

Soln:

```

<!DOCTYPE html>

<html lang="en">

<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <title>Student Report</title>

</head>

<body>

    <!-- School name -->

```

```
<h1>GLA University</h1>

<!-- Student marks table -->

<table border="1">

  <thead>

    <tr>

      <th title="Student information">Student Name</th>

      <th title="Subject 1">English</th>

      <th title="Subject 2">Mathematics</th>

      <th title="Subject 3">Computer Science</th>

      <th title="Subject 4">Physics</th>

      <th title="Subject 5">Data Science</th>

    </tr>

  </thead>

  <tbody>

    <tr>

      <td rowspan="2">Shivam Shankhdhar</td>

      <td>85</td>

      <td>90</td>

      <td>88</td>

      <td>82</td>

      <td>91</td>

    </tr>

    <tr>

      <td colspan="5">Total: 436 | Percentage: 87.2%</td>

    </tr>

  </tbody>

</table>

</body>

</html>
```

QUES 9. Build a Travel Destination Page:

- <header> with title “Top 3 Travel Destinations”
- <main> containing three <article>s — each with an <h2>, image, short paragraph, and a <blockquote> review.
- <aside> listing “Travel Tips” as an unordered list.
- <footer> with © notice.

Soln:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Top 3 Travel Destinations</title>

</head>

<body>

  <!-- Header section -->

  <header>

    <h1>Top 3 Travel Destinations</h1>

  </header>

  <!-- Main content -->

  <main>

    <!-- Destination 1 -->

    <article>

      <h2>Paris</h2>

      

      <p>Paris is a beautiful city famous for its art, culture, architecture, and the Eiffel Tower.</p>

      <blockquote>"Paris is always a good idea."</blockquote>

    </article>
```

```
<!-- Destination 2 -->

<article>

  <h2>Manali</h2>

  

  <p>Manali is a scenic hill station known for its mountains, pleasant weather, and adventure activities.</p>

  <blockquote>"Manali is a perfect place to enjoy nature and adventure."</blockquote>

</article>
```

```
<!-- Destination 3 -->

<article>

  <h2>Goa</h2>

  

  <p>Goa is a popular destination known for its beaches, beautiful sunsets, and vibrant atmosphere.</p>

  <blockquote>"Goa is the perfect place for a relaxing beach holiday."</blockquote>

</article>

</main>
```

```
<!-- Travel tips -->

<aside>

  <h2>Travel Tips</h2>

  <ul>

    <li>Carry necessary documents and identification.</li>

    <li>Keep your belongings safe.</li>

    <li>Check the weather before travelling.</li>

    <li>Plan your accommodation in advance.</li>

  </ul>

</aside>
```

```
<!-- Footer section -->

<footer>
```

```
<p>&copy; 2026 Shivam Shankhdhar</p>
</footer>
</body>
</html>
```

QUES 10. Create a Dropdown-based Selection Page:

- Add multiple <select> dropdowns for:
 - Country
 - State
 - City
 - Favorite Tourist Place
- Each dropdown must have a pre-selected option.
- Add a <p> summarizing your choices.

Soln :

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Travel Selection</title>
</head>
<body>
  <!-- Dropdown-based selection page -->
  <h1>Travel Destination Selection</h1>

  <label for="country">Country:</label>
  <select id="country" name="country">
    <option value="india" selected>India</option>
    <option value="usa">USA</option>
    <option value="uk">United Kingdom</option>
  </select>
```

<label for="state">State:</label>

<select id="state" name="state">

<option value="uttar-pradesh" selected>Uttar Pradesh</option>

<option value="uttarakhand">Uttarakhand</option>

<option value="rajasthan">Rajasthan</option>

</select>

<label for="city">City:</label>

<select id="city" name="city">

<option value="mathura" selected>Mathura</option>

<option value="agra">Agra</option>

<option value="lucknow">Lucknow</option>

</select>

<label for="place">Favorite Tourist Place:</label>

<select id="place" name="place">

<option value="mussoorie" selected>Mussoorie</option>

<option value="manali">Manali</option>

<option value="goa">Goa</option>

</select>

<!-- Summary of selected choices -->

<p>

My selected destination is Mathura, Uttar Pradesh, India,

and my favorite tourist place is Mussoorie.

</p>

</body>

</html>

QUES 11. Design a News Layout Page:

- <header> → Site name
- <nav> → News Categories (Sports, Technology, Politics)
- <main> → 3 <article>s each with headline, date (<time>), short content, and a source link.
- <aside> → Popular Topics list
- <footer> → Contact & rights info.

Soln:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Daily News</title>
</head>
<body>
  <!-- Header section -->
  <header>
    <h1>Daily News</h1>
  </header>

  <!-- News categories -->
  <nav>
    <a href="#">Sports</a> |
    <a href="#">Technology</a> |
    <a href="#">Politics</a>
  </nav>

  <!-- Main news content -->
  <main>
    <!-- Sports article -->
```

```
<article>

  <h2>India Wins an Exciting Match</h2>

  <time datetime="2026-08-17">August 17, 2026</time>

  <p>India delivered a strong performance and won an exciting match with excellent
teamwork.</p>

  <a href="#">Source: Sports News</a>

</article>

<!-- Technology article -->

<article>

  <h2>New Technology Trends Emerging</h2>

  <time datetime="2026-08-17">August 17, 2026</time>

  <p>New developments in artificial intelligence and technology are creating exciting
opportunities.</p>

  <a href="#">Source: Technology News</a>

</article>

<!-- Politics article -->

<article>

  <h2>Important Political Discussions Held</h2>

  <time datetime="2026-08-17">August 17, 2026</time>

  <p>Political leaders discussed important issues and plans for future development.</p>

  <a href="#">Source: Politics News</a>

</article>

</main>

<!-- Popular topics -->

<aside>

  <h2>Popular Topics</h2>

  <ul>

    <li>Artificial Intelligence</li>

    <li>Cricket</li>
```

```

        <li>Technology</li>
        <li>Education</li>
    </ul>
</aside>
<!-- Footer section -->
<footer>
    <p>Contact: news@example.com | &copy; 2026 Daily News. All Rights Reserved.</p>
</footer>
</body>
</html>

```

QUES 12. Create a Quotation Showcase Page:

- Add three <blockquote> quotes from different authors.
- Include <cite> for each author.
- Wrap each quote inside a <section> and give each a <h2> title.
- End with a paragraph summarizing why quotes inspire people.

Soln:

```

<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Quotation Showcase</title>
</head>
<body>
    <!-- Quotation 1 -->
    <section>
        <h2>Success</h2>
        <blockquote>
            "Success is not final, failure is not fatal: it is the courage to continue that counts."
        </blockquote>
    
```

```

    <cite>— Winston Churchill</cite>
</section>

<!-- Quotation 2 -->
<section>
    <h2>Dreams</h2>
    <blockquote>
        "The future belongs to those who believe in the beauty of their dreams."
    </blockquote>
    <cite>— Eleanor Roosevelt</cite>
</section>

<!-- Quotation 3 -->
<section>
    <h2>Learning</h2>
    <blockquote>
        "Live as if you were to die tomorrow. Learn as if you were to live forever."
    </blockquote>
    <cite>— Mahatma Gandhi</cite>
</section>

<!-- Summary -->
<p>
    Quotes inspire people by sharing meaningful ideas and experiences.
    They motivate us to stay positive, overcome challenges, and work
    towards our goals.
</p>
</body>
</html>

```

QUES 13. Build a Blog Layout Page using HTML5 semantic structure:

- <header> → Blog name

- <nav> → Menu (Home, Blogs, About)
- <main> →
- <article> 1: “My First Blog”
- <article> 2: “Things I Learned This Week”
- Each article should have its own heading, paragraph, <time> tag, and <blockquote> inside.
- <footer> → “Written by [Your Name]”.

Soln:

```
<!DOCTYPE html>

QUES 14. Create a Movie Database Page using a <table>:

- Columns: Movie Name, Genre, Year, IMDB Rating, and Link.
- Include attributes like border, title, and colspan.
- Add a caption at the top and a note at the bottom using <small>.

Soln:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Movie Database</title>

</head>

<body>

  <!-- Movie database table -->

  <table border="1">

    <caption>Movie Database</caption>

    <thead>

      <tr>

        <th title="Name of the movie">Movie Name</th>

        <th title="Movie category">Genre</th>

        <th title="Release year">Year</th>

        <th title="IMDb rating">IMDB Rating</th>

        <th title="Movie information">Link</th>

      </tr>

    </thead>

    <tbody>

      <tr>

        <td>3 Idiots</td>

        <td>Comedy/Drama</td>

        <td>2009</td>

        <td>8.4</td>

        <td><a href="#">IMDb</a></td>

      </tr>

      <tr>
```

```

        <td>Interstellar</td>

        <td>Sci-Fi</td>

        <td>2014</td>

        <td>8.7</td>

        <td><a href="#">IMDb</a></td>
    </tr>

    <tr>

        <td>Inception</td>

        <td>Sci-Fi/Thriller</td>

        <td>2010</td>

        <td>8.8</td>

        <td><a href="#">IMDb</a></td>
    </tr>

    <tr>

        <td colspan="5">End of Movie Database</td>
    </tr>
</tbody>
</table>

```

```

<!-- Note at the bottom -->

```

```

<small>Note: IMDb ratings are provided for demonstration purposes.</small>

```

```

</body>

```

```

</html>

```

QUES 15. Build a Portfolio Layout Page using HTML only:

- <header> → Your name and role
- <nav> → Navigation links
- <main> →
 - <section> “About Me” (paragraph + quote)
 - <section> “Skills” (unordered list)
 - <section> “Projects” (ordered list or table)

- <aside> → Contact Info (email, phone, LinkedIn link)
- <footer> → Closing copyright line

Soln:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Shivam Shankhdhar - Portfolio</title>

</head>

<body>

  <!-- Header section -->

  <header>

    <h1>Shivam Shankhdhar</h1>

    <p>Computer Science Student & Data Science Enthusiast</p>

  </header>

  <!-- Navigation section -->

  <nav>

    <a href="#about">About Me</a> |

    <a href="#skills">Skills</a> |

    <a href="#projects">Projects</a> |

    <a href="#contact">Contact</a>

  </nav>

  <!-- Main content -->

  <main>

    <!-- About Me section -->

    <section id="about">

      <h2>About Me</h2>
```

<p>I am a Computer Science student specializing in Data Science and Artificial Intelligence. I enjoy coding, data analysis, machine learning, and learning new technologies.</p>

<blockquote>"The best way to predict the future is to create it."</blockquote>

</section>

<!-- Skills section -->

<section id="skills">

<h2>Skills</h2>

Python
